Californians and Their Government—October 2024
Full Crosstabs–Likely Voters Only

Methodology Note:

Findings are based on a survey of 1,646 California adult residents, conducted online using the Ipsos KnowledgePanel. Interviews were conducted in English and Spanish according to the respondents' preferences. The median time to complete the survey was 12.9 minutes. Interviewing took place from October 7—15, 2024.

These crosstabs are based on a subgroup of 1,137 likely voters. The sampling error, taking design effects from weighting into consideration, is ±3.7 percent at the 95 percent confidence level for the unweighted sample of 1,137 likely voters. The sampling error for unweighted likely voter subgroups is larger. Sampling error is only one type of error to which surveys are subject. Results may also be affected by factors such as question wording, question order, and survey timing.

If you have any questions or require additional information regarding this survey, please contact surveys@ppic.org
